

Efficient corrugators at low cost

Generally, a huge amount of waste occurs in the production of small and middle-sized corrugated plastic pipe, causing unnecessarily

high costs.

Unicor of Germany has developed corrugators that eliminate waste with its UC15 vario/ vacuum, UC58 vario/

vacuum, and UC58/70 ECO corrugators.

Innovative vario-technology enables the user to produce variable pipe lengths according to requirement, optimising production and profit.

The company will exhibit at Chinaplas 2007 this month.
